Implementing Stop the Pressure

A Practical Guide to

Eliminating Heel Pressure Ulcers

Friday 23rd March 2018 De Vere West One Conference Centre, London

"In the NHS in England from April 2015 to the end of March 2016, 24,674 patients were reported to have developed a new pressure ulcer...Collectively we should not feel that this is an acceptable position for our patients...In May 2016 4.5 % of reported ST patients had a pressure ulcer = 8,426 patients...We are seeing a plateau and variation in organisations"

NHS Improvement February 2017

"The Heel is the second most common site for pressure ulcer development"

Nursing Centre

"Research shows between 80% and 95% are avoidable"

Stop the Pressure Campaign, NHS England

"Pressure ulcers will be priority areas for 2016/17 as the first part of our programme on patient safety initiatives" NHS Improvement, Business plan 2016/17, July 2016

This conference focuses on a practical guide to eliminating heel pressure ulcers and improving care and treatment in your service

National updates and practical case studies will provide essential guidance on:

- Reducing avoidable heel pressure ulcers
- Changing practice in the early detection of heel pressure ulcers
- Reducing the incidence of hospital acquired heel pressure ulcers in practice
- Undertaking effective Heel Checks
- React to Red: Communicating heel pressure ulcer prevention

The conference will also include a pre conference supplier showcase to update delegates about the latest product developments in this area.

100% of delegates at our previous conference on this subject would recommend the event to a colleague
